

## **M.A. Psychology**

### **Program outcome-**

- The learner will be able to create a strong research oriented theoretical foundation in consonance with recent advances in the discipline.
- The learner will be able to take a creative, empirical and ethical approach to the program that combines conceptual repertoire and research practices in both quantitative and qualitative traditions.
- The learner will be able to provide an opportunity to extend the knowledge base to the world of practice with a view to promote healthy interface between academia and society.

### **MA Psychology- I Semester**

#### **Course code: PSY101 - A conceptual History of Psychology**

#### **Course outcome-**

- The learner will be to explain about the wider (global) history of psychology in general and India in particular.
- The learner will be to highlight the paradigms and dominant concerns of mainstream euro American psychology and issues there in.
- The learner will be able to elucidate the major paradigms of psychological knowledge in India and highlight the contribution of Indian knowledge system.
- The learner will be able to critically appreciate the significant contributions of major schools of psychology evolved in eastern and western traditions.

#### **Course code- PSY 102- Cognition, Neuroscience and consciousness**

#### **Course Outcome-**

- The learner will be able to discuss with critical issues in the study of mind.
- The learner will be able to outline recent discoveries in neuroscience/neurobiology which indicate a major paradigm shift in the understanding of mind and self.

- The learner will be able to highlight the major findings, limitations and critical issues in the field of consciousness studies.
- The learner will be able to delineate major contributions from Indic sciences to the understanding of consciousness.

**Course code: PSY103 - Counseling psychology: Skills, Areas and Related Discipline**

**Course outcome-**

- The learner will be able to train the students with counseling skills.
- The learner will be able to explain the application of counseling in different areas.
- The learner will be able to discuss about the connection with and difference from related other disciplines.

**Course code- PSY S01- Research Methodology & Computer Application:**

**Basics**

**Course outcome-**

- The learner will be able to apply the concept and place of research in concerned subject.
- The learner will be able to get acquainted with various resources for research.
- Become familiar with various tools of research.
- The learner will be able to get conversant with sampling techniques, methods of research and techniques of analysis of data.
- The learner will be able to identify the skills in various research writings.
- The learner will be able to get acquainted with computer fundamentals and office software package.

## **Course code- PSYA01- Understanding Disaster Management**

### **Course outcome-**

- The learner will be able to grasp the definitions, debates and controversies surrounding the conceptualization of disaster within interdisciplinary science and social science.
- The learner will be able to talk about an overview of the disaster management cycle and what psychologists can contribute towards survivors with a focus on prevention and psycho-social rehabilitation.

## **Course code- PSY11- Psychological assessment and advance counseling skills (Practicum)**

### **Course outcome-**

- The learner will be able to talk about the various assessment approaches and tools. Training students to select administer, score and interpret various types of general psychological tools.
- The learner will be able to find the Participant observation and supervised practice of different methods of counseling.
- The learner will be able to engage with the process of conscious self development and self mastery.
- The learner will be able to discuss about the complexities and nuances of life and find a personality meaningful vein on the existential issues of life.
- The learner will be able to explain about the importance of exposure in counseling in different areas.
- The learner will be able to survey the needs and problems of Indian students.

## **MA Psychology- Semester – II**

### **Course code- PSY201 Computer Applications in Psychology**

#### **Course Outcome-**

- The learner will be able to explain the ways computer software is used in psychology.
- The learner will be able to talk about the specific applications of software in different fields of psychology.
- The learner will be able to demonstrate the document preparation database management, statistical analysis laboratory/experimental control, simulation of behavior and cognitive processes.

### **Course code- PSY202- Self Psychology in Indian and Western thought Traditions**

#### **Course Outcome-**

- The learner will be able to integrate the classical Indian perspectives on self.
- The learner will be able to integrate the classical western perspectives on self.
- The learner will be able to highlight some contemporary concerns pertaining to self in the global context.
- The learner will be able to delineate some key concerns pertaining to self and identity in contemporary India.

### **Course code: PSYS3 203 - Psychiatric perspective on disaster trauma**

#### **Course outcome-**

- The learner will be able to talk about the psychiatric perspective on the psychological impact of trauma.
- The learner will be able to discuss on critical evaluation of the psychiatric perspective towards experience near approach to post disaster care and rehabilitation.

### **Course code- PSY B02- Positive Emotions and Health**

**Course outcome-**

- The learner will be able to talk about the topics related to the positive aspects of human experience and their impact on health.
- The learner will be able to promote health aspects rather than focusing on the diagnosis and treatment disease.

**Course code- PSY 221- Social out rich and skill development****Course outcome-**

- The learner will be able to explain about the research methodology in the subject.
- The learner will be able to prepare for the pursuing research in theoretical and experimental areas of the subject.

## **MA Psychology- III Semester**

### **Course code- PSY301- Introduction to clinical psychology**

#### **Course outcome-**

- The learner will be able to explain the history and development of clinical psychology as a field in India and its evolving professional identity.
- The learner will be able to discuss about the major theoretical models which guide clinical psychological practice and research.
- The learner will be able to apply the clinical assessment process and its applications in various domains.

### **Course code- PSY302- Psychopathology**

#### **Course outcome-**

- 1The learner will be able to explain about the various manifestation of psychopathology.
- 2. The learner will be able to apply the OSM V and ICD10 classificatory systems in the context of diagnosis of various psychiatric/psychological disorders.

### **Course code- PSY303- Post Disaster Psycho-social Rehabilitation**

#### **Course outcome-**

- The learner will be able to explain the basics of psycho-social rehabilitation in the aftermath of natural and human made disasters.
- 2.The learner will be able to provide the to provide an exposure for the students to the theory and practice of psychiatric treatment concluding psychotherapy as well as healing though cultural beliefs and symbols band human relationships.

**Course code- PSY311- Clinical Assessment and Advance Counseling Skills (Practicum)**

**Course outcome-**

- The learner will be able to work in the field of clinical psychology through the real life professional.
- The learner will be able to talk about the clinical case narratives and able to demonstrate and engaged understanding of various kinds of psychopathologies.
- The learner will be able to develop basic therapeutic/counseling skills.

**Course code- PSY S02- Intellectual property human rights & environmental basics**

**Course outcome-**

- The learner will be able to explain the concept and place of research in concerned subject.
- The learner will be to get acquainted with various resources for research.
- The learner will be able to become familiar with various tools of research.
- The learner will be able to get conversant with sampling techniques, methods of research and techniques of analysis of data.

**Course code- PSY C01- Positive Psychology Clinical and Community Interventions**

**Course outcome-**

- The learner will be able to talk about the positive psychology perspective on illness and health.
- The learner will be able to explain the specific techniques of intervention anchored in positive psychology perspective.
- The learner will be able to become familiar with the specific application of positive Psychology based interventions in clinical and community work.

## **MA Psychology- Semester IV**

### **Course code- PSY 401 Psychotherapy**

#### **Course outcome-**

- The learner will be able to apply the theories and techniques of major psychotherapy approaches.
- 2. The learner will be able to explain the importance of psychotherapy research.

### **Course code- PSY 402- Neurobiological Assessment and rehabilitation**

#### **Course outcome-**

- 1. The learner will be able to summarize the general orientation towards applications of neurobiological assessment and rehabilitation.
- 2The learner will be able to discuss about the basic concepts tool and techniques of neurobiological assessment and rehabilitation.
- 3. The learner will be able to explain the behavioral diagnosis, classification and assessment of neurobiological assessment.

### **Course code – PSY 403- Psychiatric Perspective on Disaster issue**

#### **Course outcome-**

- The learner will be able to explain the psychiatric perspective on the psychological impact of trauma.
- The learner will be able to induce a critical evaluation of the psychiatric perspective toward experience near approach to post disaster care and rehabilitation.

### **Course code- PSY 421- Dissertation**

#### **Course outcome-**

- The learner will be able to create different skills or discover different skills in research and developmental activities.

## **Course code- PSY D03- Positive Psychology in Day today living**

### **Course outcome-**

- The learner will be able to apply positive psychology in the disciplinary matrix.
- 2. The learner will be able to select the different perspective on the values and choices related to good life.
- The learner will be able to explain the different dynamics of pursuing happy life.
- The learner will be able to apply the principles of positive psychology for developing good life style.

## **M.A. Economics**

### **Programme outcome-**

- The learner will be able to know the usefulness and importance of subject in daily life and in Economy also.
- The learner will be able to know about, how the societies government, business, household, industry allocate their scarce resources.
- The learner will be able to understand the dependency of all the Banking system like RBI credit control, investment, capital information private, real estate companies on Economy.
- The learner will be to know the demand of supply, competitive markets making decision price determination. How to determinate rent, wages profit.
- The learner will be able to know the contribution of economy in different areas and sectors like environment, agriculture sector, green revolution, land reforms different techniques. These are very useful in daily life also.
- The learner will be able to know the importance of economy for making five year plans monetary and fiscal policy, I.M.F. World Bank and all type of Economic aids.

## **M.A. Economics I Semester**

### **Course code: ECO 101- Micro Economic-I**

#### **Course outcome-**

- The learner will be able to Analysis the behavior pattern of different Economic bodies regarding profit Price, Cost etc.
- The learner will be able to make decision process easy in different market situation like perfect, Imperfect, Monopolistic and Oligopoly and Monopoly markets.
- The learner will be able to deal the profit in the distribution theory- like rent wages interest, profit.
- The learner will be able to purchase goods and commodities, demand and supply theory is also very useful in daily life.

- The learner will be able to learn the Laws of returns and law of variable proportion, which is useful in Agriculture and other sector.

**Course code: ECO 102- Macro- Economics- I**

**Course outcome-**

- The learner will be able to learn about National income and nation-accounting.
- The learner will be able to gain knowledge about Different quantitative methods of money like Cambridge theory fisher etc.
- The learner will be able to learn about the modern theory of interest
- The learner will be able to learn the income and Employment theory.
- The learner will be able to learn the inflation and deflation theory.
- The learner will be able to learn about International Trade and Moneta policy.

**Course Code: ECO 103- Public Economics- I**

**Course outcome -**

- The learner will be able to acquire knowledge about public revenue-tax, nontax revenue different theories of tax, taxation.
- The learner will be able to gain knowledge about public enterprises, firms, their role price policy, fiscal policy, monetary policy.
- The learner will be able to acquire knowledge about public expenditure how the Govt. use the revenue for public.
- The learner will be able to learn budget, India's finance commission's role in Economy.

**Course Code: ECO-A03 Industrial Economics- I**

**Course Outcome:**

- The learner will be able to understand on the basic issues such as productivity, efficiency, capacity utilization and involved in the industrial development of India and comparative with other countries also.
- The learner will be able to gain knowledge of all the objectives and know the importance of the study of industrial development of India.
- The learner will be able to gain knowledge in an analytical manner particularly in the Indian content.

**Course Code: ECOSO1 Research Methodology & Computer Application Basics**

**Course Outcome-**

- The learner will be able to understand the concept and place of research in concerned subject.
- The learner will be able to get acquainted with various resources for research.
- The learner will be able to become familiar with various tools for research.
- The learner will be able to achieve skills in various research writings.
- The learner will be able to get acquainted with computer fundamentals and office software package.

**M.A. Economics II Semester**

**Course Code: ECO-201- Micro Economic- II**

**Course Outcome:**

- The learner will be able to gain knowledge micro and macro perspectives of income distribution and helps in developing insight into working of economy with reference to welfare of individual and its implications.

## **Course Code: ECO202- Macro Economics- II**

### **Course outcome-**

- The learner will be able to develop the knowledge and understanding of theory and concepts of financial market system among students.
- The learner will be able to analysis and establish the functional between the large aggregates.
- The learner will be able to understand is not only a scientific method of analysis, but also a body of empirical economic.
- The learner will be able to gain knowledge about the alternative theories of endogenous expectations formation.
- The learner will be able to understand the overall structure of the economy in a theoretical perspective at higher level for the students.

## **Course Code: ECO203 -Public Economics- II**

### **Course outcome-**

- The learner will be able to develop an understanding various aspects public choice theory.
- The learner will be able to understand the various aspects of fiscal policy, tax system, and debt management.
- The learner will be able to become familiar with the different aspects of fiscal federalism.

## **Course Code: ECO221- Social out Reach and Skill Development**

### **Course outcome-**

- The learner will be able to become familiar with different villages, industries and departments also.

- The learner will be able to enhance the observation capability of students and assess real life situations for future research application.
- 3. The learner will be able to use the generated database profitably for advance research studies.

**Course Code: ECOBO3 Industrial Economics- II**

**Course outcome-**

- The learner will be able to achieve the assigned target for the development of industries.
- The learner will be able to provide information about sources of nature.
- The learner will be able to understand the Industrial growth and theories to find out the location to establish the industry.
- The learner will be able to understand such issues as the levels at which capacity, output and prices are set, the extent that products are differentiated from each other.

**M.A. Economics III Semester**

**Course Code: ECO301- International Economics-I**

**Course outcome-**

- The learner will be able to know international trade theories, practices and policies.
- The learner will be able to know to examine the impact of trade policies followed by welfare implications.

**Course Code: ECO302- Contemporary Issues in Indian Economy- I**

**Course outcome-**

- The learner will be able to develop ideas of the basic characteristics of Indian economy for the students.
- The learner will be able to grasp the importance of planning undertaken by the government of India.
- The learner will be sharpened in analytical ability of highlighting and integrated approach to the functioning aspects of the Indian Economy.
- The learner will be able to know the basic knowledge on national income human resources development infrastructure, regional imbalance and finance, sources of state and central government.

**Course Code: ECO303- Environmental Economics Theories**

**Course outcome-**

- The learner will be able to realize the importance and influence of environment on the economy including the quality of manpower.
- The learner will be able to learn about climate change and effect.
- The learner will be able to know about the pollution-and its effect.
- The learner will be able to understand about the scientific management of waste materials.
- The learner will be learning to keep the environment clean and bring harmony.

**Course Code: ECOCO3 -Basic Mathematics for Economics**

**Course outcome-**

- The learner will be able to collect data like primary and secondary data in research.
- The learner will be able to use and apply central tendency dispersion, skewers and kurtosis.

- The learner will be able to measure mortality rates population growth, knowledge how to population data is changing in our country, estimate population trend etc.
- The learner will be able to explain in two variables and interpret correlation is very useful.
- Mathematics has found its applications in economics in the form of model building for planning and development. Students can use it in different research/papers.
- The learner will be able to grow in understanding of Mathematical transformation of the economic theory which provides precision to the logic and knowledge of economics.
- The learner will be equipped with the basic understanding of mathematics, which they may use in advance course.

**Course Code: ECOCO2- Agricultural Economics: Theories**

**Course outcome-**

- The learner will be able to understand the importance of agriculture, which are the main distinctive features of rural and urban economy or agricultural and non agricultural.
- The learner will be able to understand the area of Horticulture fishing and cottage industry. These are very useful part of agriculture.
- The learner will be able to acquire knowledge about sustainable agricultural, which is very useful.
- The learner will be able to demonstrate the scientific management of waste materials.
- The learner will be able to bring awareness about health, quality of human beings biodiversity levels etc.

- The learner will be able to know the usefulness use of cow dung manure, which is high in organic materials and rich in nutrients. Farmers can use it in their agriculture and production will be much green revolution effect.

## **M.A.Economics IV Semester**

### **Course Code: ECO401- International Economics-II**

#### **Course outcome-**

- The learner will be able to understand the economics international trade finance and trade managing institutions in era of globalization of national.
- The learner will be able to know the positive balance of payment situation of a nation.
- The learner will be able to gain knowledge on the subject of international trade.

### **Course Code: ECO402 -Contemporary Issue in Indian Economy**

#### **Course outcome-**

- The learner will be able to understand the agriculture as the foundation of economic growth and development.
- The learner will be able to analyze the progress and changing nature of agriculture sector.
- The learner will be able to define the globalization and its effect on agriculture.
- The learner will able to discuss govt. policies and programme.
- The learner will be able to know the overall social political and economic environment influencing policy.

## **Course Code: ECO403- Environmental Economics Issues and Policies**

### **Course outcome-**

- The learner will be able to design appropriate environmental policies and evaluate it.
- The learner will be able to focus on environmental damages such as Air pollution water quality, toxic substances, solid waste and global warming, etc.
- The learner will be able to focus on natural resources and learn how to protect resources like, soil, forest, water sea fish etc.

## **Course Code: ECODO1- Basic statistics for Economists**

### **Course outcome-**

- The learner will be able to become familiar with basic statistical techniques.
- The learner will be able to discuss the statistical techniques with examples from economics.
- The learner will be able to use the different tools of statistics like co-relation, mean and different test for research purpose.

## **Course Code: ECODO2- Agriculture Economics Issues and Policies**

### **Course outcome-**

- The learner will be able to sensitize the overall development and growth of engine in agriculture.
- The learner will be to learn and identify the opportunities open/available in those flourishing sectors such as horticulture, fishing, and forestry.
- The learner will be to utilize limited resources.
- The learner will be to gain knowledge the production and productivity.

- The learner will be able to become aware of the rich natural endowments to achieve sustainable agricultural development, land size etc.

## **M.A. Geography**

### **Programme outcome-**

- The learner will be able to identify and assess how geographic concepts applicable in our daily life workplace and society to solve problems.
- The learner will be able to demonstrate and defend research work in oral Witten and geographic forms.
- The learner will be able to understand the literature, at least one particular geographic subfield.
- The learner will be able to acquire, analyze, evaluate and interpret geographic data in research.

### **M.A. Geography I Semester**

#### **Course code: GEO 101- Geomorphology**

##### **Course outcome-**

- The learner will be able to understand geomorphology with reference to certain fundamental concepts.
- The learner will be able to understand the unity of geomorphology in the earth materials and the processes with or without an element of time.
- The learner will be able to provide and understand the concept and dynamic aspects of landforms development.
- The learner will be able to understand the relevance of applied aspects of geomorphology in various fields.

#### **Course code: GEO 102- Climatology**

##### **Course outcome-**

- The learner will be able to understand the weather phenomena, dynamics of global, climates and generation of climatic information and their application.
- The learner will be able to understand climate change and its reason.

## **Course code: GEO 103- Geography of India**

### **Course outcome-**

- The learner will be able to know about a comprehensive integrated and empirically based profile of India.
- The learner will be able to understand the relationship between systematic geography of India with the regional personality of the country.
- The learner will be able to understand geographical positioning and personality of India and its inter-relations with other countries.

## **Course code: GEO S01- Research Methodology & Computer Application: Basics**

### **Course outcome-**

- The learner will be able to understand the concept and place of research in concerned subject.
- The learner will be able to know about different resources of research.
- The learner will be able to understand the method of research and techniques of analysis data.
- The learner will be able to gain knowledge of computer fundament and office software package.

## **Course code: GEO A03- Fluvial geomorphology**

### **Course outcome-**

- The learner will be able to understand about fluvial forms and processes.
- The learner will be able to know about flow patterns, sediment load and channel patterns.
- The learner will be able to know about use and functions of river.

## **Course code: GEO A02 – Tropical geomorphology**

### **Course outcome-**

- The learner will be able to know about arid, semiarid climatic regions which occupy a major portion of the continent.
- The learner will be able to understand about aridity, bio-mass and human interferences.

- The learner will be able to know about erosion, transportation and deposition of wind.

**Course code: GEO A04- Geographical Dimension of Hydrology**

**Course outcome-**

- The learner will be able to know about finite nature of hydrology.
- The learner will be able to understand about fresh water resources and occurrence flow, storage and utilization.
- The learner will be able to realize the importance of judicious utilization and conservation of water and its availability over space and its temporal dimensions.

**Course code: GEO A01- Constitutionalism & Indian Political System**

**Course outcome-**

- The learner will be able to know about constitutionalism.
- The learner will be able to gain knowledge various union executive.
- The learner will be able to achieve skills in various writings.

**M.A. Geography II Semester**

**Course code: GEO 201- Environmental Geography**

**Course outcome-**

- The learner will be able to see overview of environment at geography and its interface with earth.
- The learner will be able to understand the existing reality of resource utilization and environmental depletion.
- The learner will be able to know the concept of sustainable resource use and sustainable development.

## **Course code: GEO 202- Geographical thought and methodology**

### **Course outcome-**

- The learner will be able to know about philosophical and methodology foundations of the subject and its place in the world of knowledge.
- The learner will be able to become familiar with the major landmarks development of geographic thought at different periods of time.
- The learner will be inspired different works of great geographers and want to do some new work at list in local level.

## **Course code: GEO 203- Oceanography**

### **Course outcome-**

- The learner will be able to know many facts of oceans such as evolution of the oceans, physical and chemical properties of sea water atmospheric and oceanographic circulation.
- The learner will be able to know about fascination world of marine life and the character sties of marine environment and the impact of man on the marine environment.

## **Course code: GEO 221- Social Outreach and Skill Development**

### **Course outcome-**

- The learner will be able to know about research methodology in the subject.
- The learner will be able to prepare them for the pursuing in theoretical, experimental or computational areas of the subject.

## **Course code: GEO B01- Environmental and Forest Law**

### **Course outcome-**

- The learner will be able to know the different acts which are related with forest and environment.
- The learner will be able to become familiar with rules and regulations which have made to protect and conserve environment and forest and implementation of role and regulations.

### **Course code: GEO B02- Biogeography**

#### **Course outcome-**

- The learner will be able to know the concept of biogeography and its interpretation and their application, interaction, between living organism with climate and physical environment, with special references to India.
- The learner will be able to understand the relationship between flora and fauna and do research work to understand their nature and use properly.

### **Course code: GEO B03- Geography of soil**

#### **Course outcome-**

- The learner will be able to know the importance soil which supports our life system.
- The learner will be able to understand about soil depuration its reason and conservation of soil.
- The learner will be able to appreciate the inherent limitations soil to a particular use and managing the soil effectiveness.

### **Course code: GEO B04- Coastal geomorphology**

#### **Course outcome-**

- The learner will be able to know about coast-sea level change, marine cycle of erosion.
- The learner will be able to gain knowledge erosion, transportation and depositional work of seawater.
- The learner will be able to know about different landscape which have made in sea coast.

## **M.A in English**

### **Programme Outcome**

- On the completion of the course, the learner will develop a passion for literature and language. Through this course students will become familiar with a wide range of works of British Writers in particular

- and world Literature in general with a special focus on Indian Writings in English and American Literature.
- The learner will be addressed the issues of culture, history, gender, race, ethnicity, and politics and negotiated in the process of importing knowledge of English Literature in its pluralistic forms.
  - The learner will be taught about past and cultivates wisdom and a world view.

## **M.A. English I Semester**

### **Course Code: MAE 101 -Poetry**

#### **Course Outcome-**

- The learner will be able to become aware of the different genres of poetry from Chaucer to Blake.
- The learner will be able to know about the ancient vocabulary and its development.

### **Course Code: MAE 102- Drama**

#### **Course Outcome-**

- The learner will be able to expose to the origin and development of English Drama and its various themes and form of different ages and stages.
- The learner will be able to understand the insights, genres, conventions and experimentations.
- The learner will be able to Associate with English Drama and the knowledge of historical, socio- political and religious trends in the plays.
- The learner will be able to explore how writers use the resources language as a creativity to explore the entire range of human experience through dramas as a literary form.

### **Course Code: MAE 103- Prose**

#### **Course outcome-**

- The learner will be able to understand the origin and Development of the English Essay and will be introduced various topics like Utopia, Allegory, Satire with appropriate writers and their contribution.
- The learner will be able to recognize and discuss the selected literary texts from Renaissance to the present literary texts in terms of genre and the canon.
- The student will be able to learn to write precisely with brevity.

### **Course Code: MAE SO1 - Social Outreach and skill Development**

#### **Course outcome-**

- The learner will be able to evaluate the effectiveness of outreach programs on academic development, personal development and civic responsibility.
- The learner will be able to understand the essentials of presentation skills, Elocution, Group discussions, and teaching of literature.

### **Course Code: MAE AO4- Literary terms and Movements**

#### **Course outcome-**

- The learner will be able to explore different literary periods and trends of each of these periods.
- The learner will be able to understand the social and cultural contexts through the study of literary movements and also learn to distinguish the features of specific literary genres.

## **M.A.English II Semester**

### **Course Code: MAE 201- Poetry II**

## **Course Outcome-**

- The students will be able to learn the poetry from various historic periods, to appreciate poetry as a literary art and its various elements of poetry, such as diction, tone, form, genre, imagery, and figure of speech etc.
- The learner will be able to identify a variety of forms and genres of poetry from diverse cultures and historic periods, such as sonnets, ballads, epic, free verse, elegy etc.
- The learner will be able to recognize the rhythm, metrics and other musical aspects of poetry.

## **Course Code: MAE 201- Drama- II**

### **Course outcome-**

- The learner will be capable to seek jobs other than the conventional teaching job, it will eliminate the errors of articulation and improve the performance of students in English.
- The learner will be capable to find connections and continuities as well as to identify disjuncture in these traditions.
- The learner will improve the thinking ability and will be able to think critically and develop a sense of appreciation for aesthetics.

## **Course Code: MAE 203- Prose- II**

### **Course outcome-**

- The learner will be able to develop their sensibilities and emotions and they will relish literature.
- They will come to know about the past ages of literature.
- The learner will become articulate and confident as well as they will have a new vistas of better job opportunities.

## **Course Code: MAE SO2- Research Methodology**

### **Course Outcome-**

- The learner will be able to identify and evaluate appropriate research sources.
- The learner will be able to incorporate the sources into documented academic writing.
- The learner will be able to formulate original arguments in response to those sources.
- The learner will be able to apply appropriate research methodologies to specific problems.

### **Course Code: MAE BO4 - Literature and Gender**

- The learner will be able to study marginalization with reference to gender as a critical category.
- The learner will be able to open up the study a gendered roles and practices in 19<sup>th</sup> and 20<sup>th</sup> century writing.
- The learner will believe that one's own sense of identity is not enough to persuade the rest of the world to agree.
- The students will learn that Human beings are no longer bound by such binary concepts as male- female or masculine- feminine. students will learn that sex is a biological concept based on biological characteristics whereas gender deals with personal, societal and cultural perceptions of sexuality

### **M.A. English III SEMESTER**

#### **Course Code: MAE 301- Critical Theory - I**

- The learner will enhance critical thinking.
- The learner will get familiarize with the key concepts & texts of literary criticism since Plato.

- The learner will recognize the historical political & aesthetic dimension of the growth of literary criticism in classical Greek and Roman Literature.

### **Course Code: MAE 302- Indian Writing English - I**

#### **Course Outcome-**

- The learner will become aware of the Indian literature.
- They will come to know about Indian genre of writings which will develop their interest in Indian aesthetics.
- They will develop a good writing and speaking skill as well as they will be able to express themselves creatively.

### **Course Code: MAE 303 - American Literature -I**

#### **Course outcome-**

- The learner will be able to identify features of short story, novel as a literary genre.
- The learner will be able to analyze American literature written from colonial times.
- The learner will be able to Interpret literary works using critical perspectives and able to Analyze American literature written from the aftermath of the civil war through current times.
- The learner will be able to extend an opportunity to study a brief history of American literature poetry, drama and fiction. And able to instills the background of civil war and Transcendentalism.

### **Course Code: MAE CO3 - Diaspora Studies**

#### **Course Outcome-**

- The learner will become familiar with the emergence and growth of Indian writing in English in the context of diasporas experience.

- The learner will be able to represent the culture, identity, history, construction of nation, gender politics, and andcross cultural transformation.

### **Course Code: CO1- Language and Linguistics**

#### **Course outcome-**

- The learner will be able to introduce the basic tools essential for a systematic study of language.
- The learner will be able to describe the historical development of the English Language.
- The learner will be able to explore the tools of linguistics to analyze the sounds, words and sentences of a language.
- The learner will be able to grasp the complexity of language as a communication system shaped by cognitive, biological, cultural and social factors.

## **M.A.English IV SEMESTER**

### **Course Code: MAE 401- Critical Theory- II**

#### **Course outcome-**

- The learner will be able to explore critical and technical theory and vocabulary to describe and analyze and formulate an argument about literary and other texts.
